SUMMARY

Front-End Engineering director specialized in the optimization of workflows throughout the business and into engineering to ensure workflow frameworks are in place and being utilized to full capacity.

PROJECT

E-commerce

July 2025 - Present

- Engineered an advanced e-commerce platform that enhanced the online shopping experience, integrated seamless payment solutions, and supported scalable product catalog management.
- Revamped the e-commerce infrastructure to enable personalized recommendations, accelerate page load times, and unify logistics tracking across multiple sales channels.
- Overhauled backend systems to fortify platform security, streamline order fulfillment workflows, and facilitate expansion into new markets through modular architecture upgrades.

Portfolio

August 2025 - Present

- Engineered a dynamic digital portfolio platform that showcased project achievements, integrated multimedia elements, and optimized user navigation for enhanced engagement.
- Revamped a digital portfolio system by incorporating responsive design principles, streamlining content organization, and elevating visual impact to strengthen online presence.
